Although the authors, together with the publisher and editors, have taken great care to ensure that information presented in the Journal of Hypertension Research reflects the standard of knowledge at the time of publication, in the event of an error committed either by the authors, editors, or publisher, neither the journal, nor its publisher or any other party involved in publishing the journal claims that the information contained is in every respect precise and complete, and as such, are not responsible for errors or omissions or for the results obtained from the use of such material. Readers are encouraged to confirm the information published by the journal with other sources. The ultimate responsibility for the use and dosage of drugs mentioned in the Journal and in interpretation of published material lies with the medical practitioner, and the editors and publishers cannot accept liability for damages arising from any errors or omissions in the journal.
